DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-21 and 32-35, drawn to channel estimate, classified in class 455, subclass 450.
 - II. Claims 22-31, drawn to interference prevention, classified in class 455, subclass 63.1.

2. Inventions in Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a channel estimate does not require a composite signal containing wanted information for a wireless device and canceling unwanted information for other wireless devices. The subcombination has separate utility such as interference cancellation/prevention.

Art Unit: 2645

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Simon Sing whose telephone number is 571-272-7545. The examiner can normally be reached on Monday - Friday, 8:30 - 5:30.
